5. It will start download as a zip file.

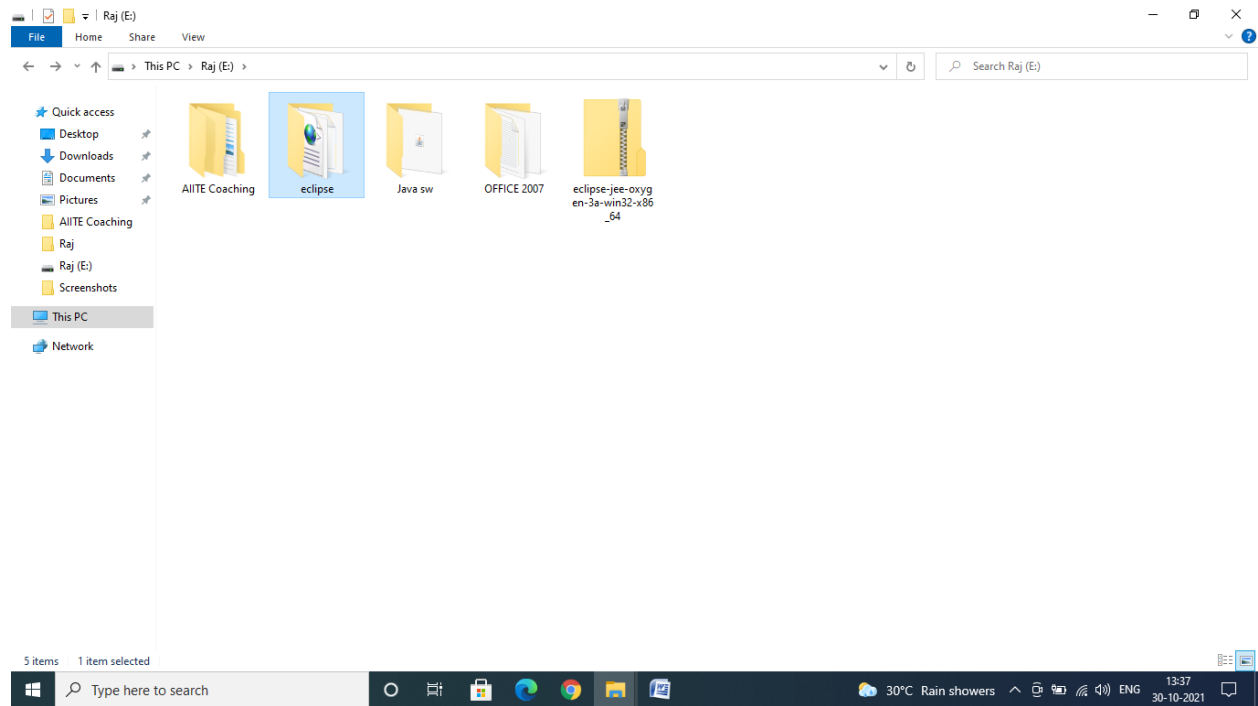

6. Once download completed, go to the folder, right click, click extract all

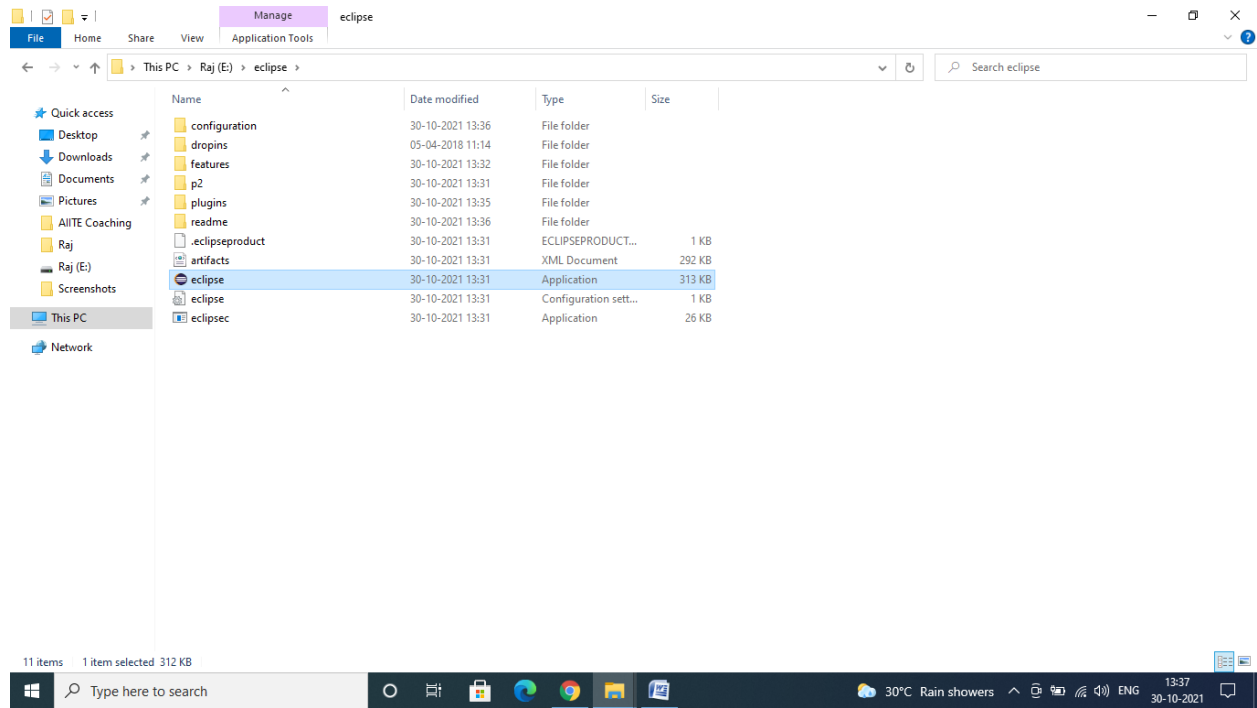

7. Click Extract

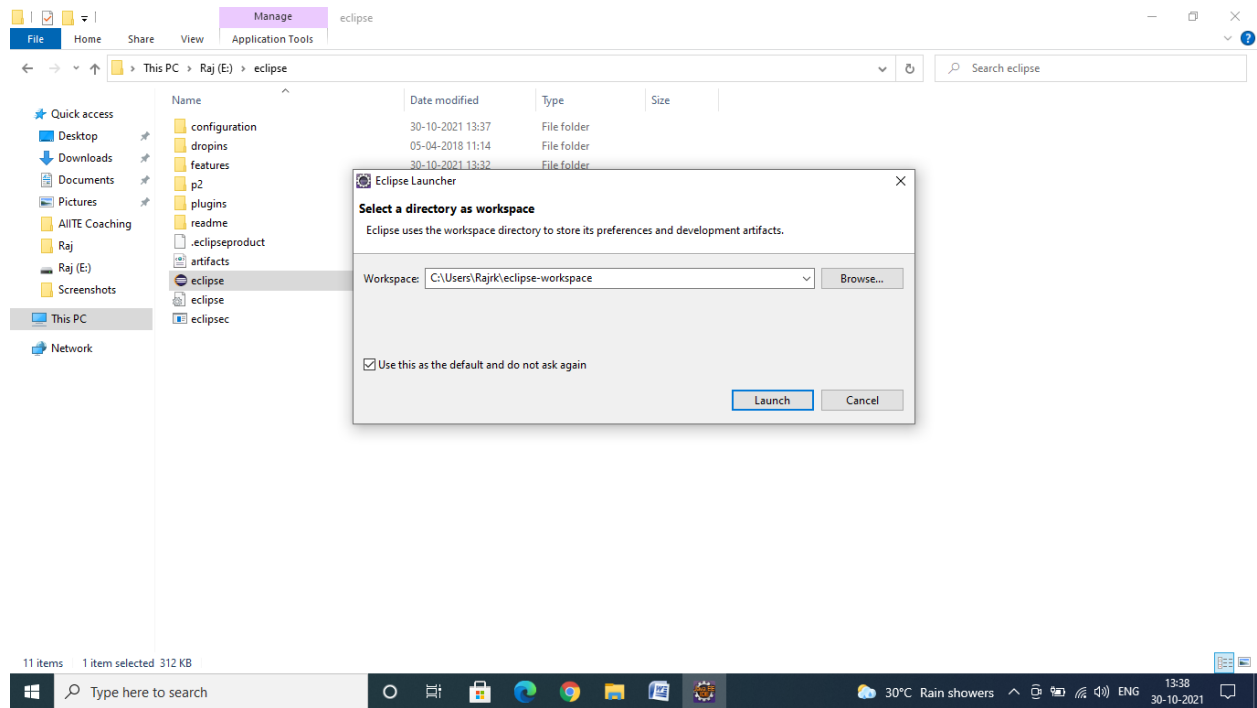

8. Open extracted eclipse folder

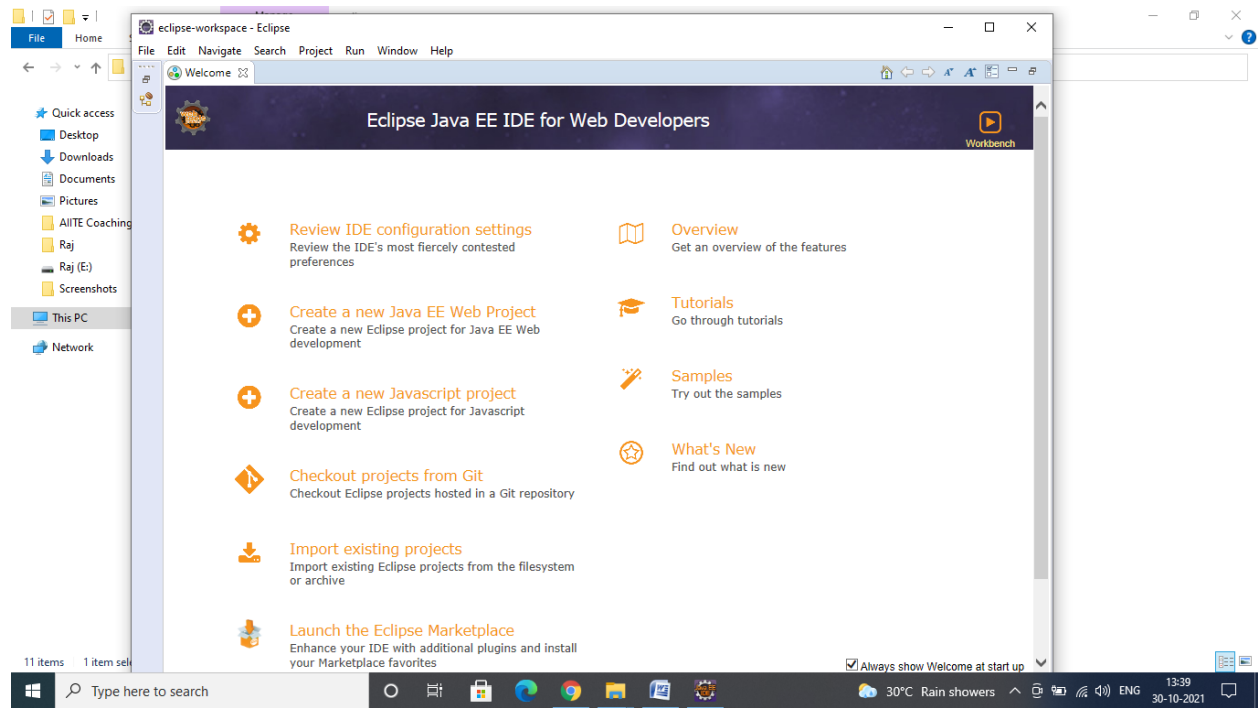

9. Open Eclipse application

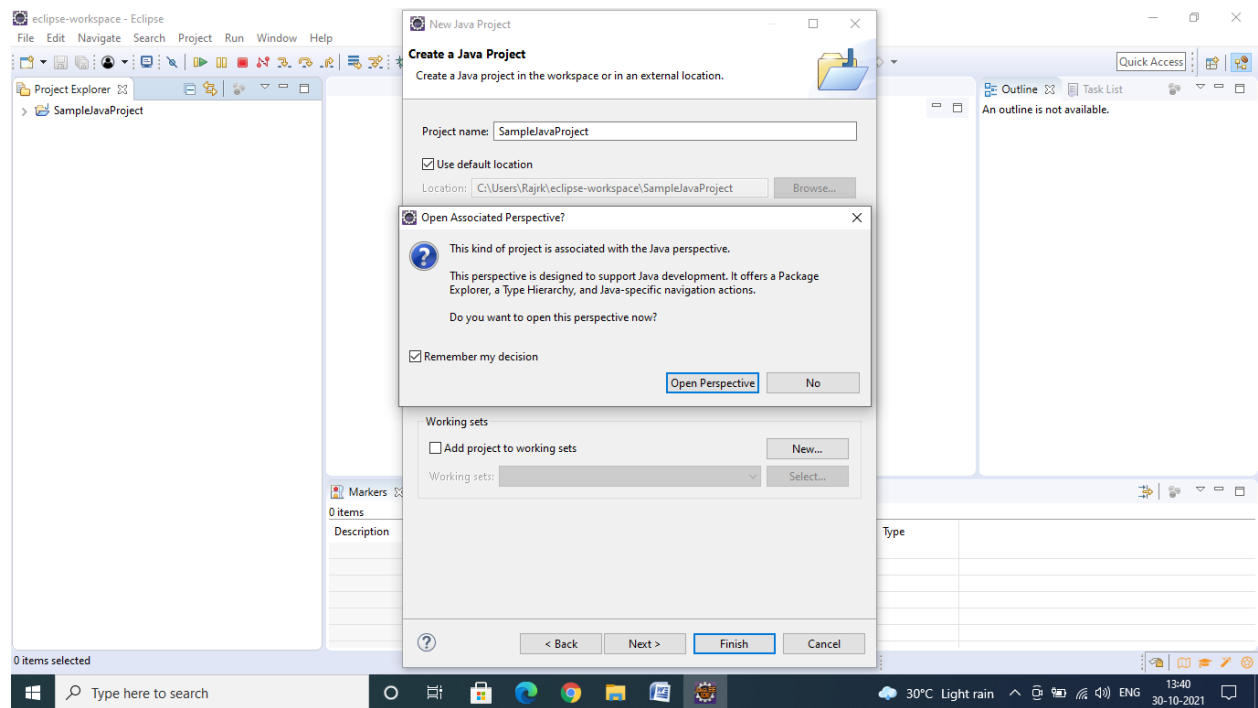

10. Click the check box as default, click Launch

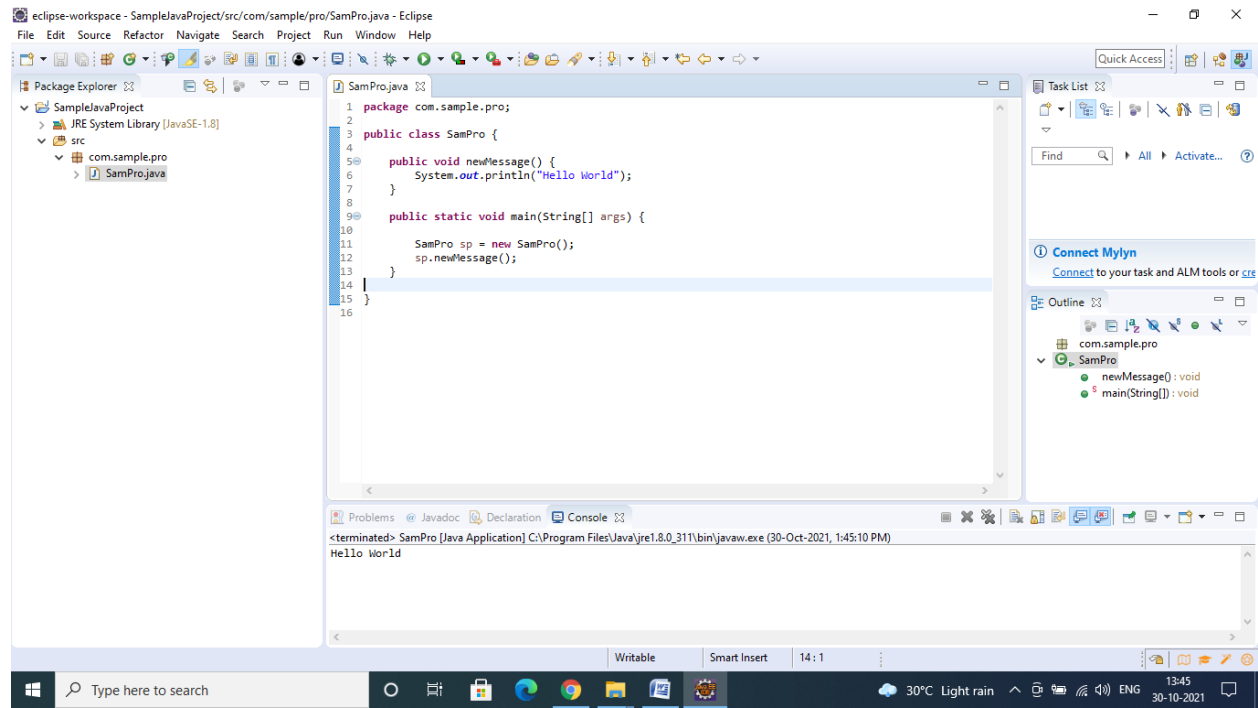

11. Click Workbench at the top right corner

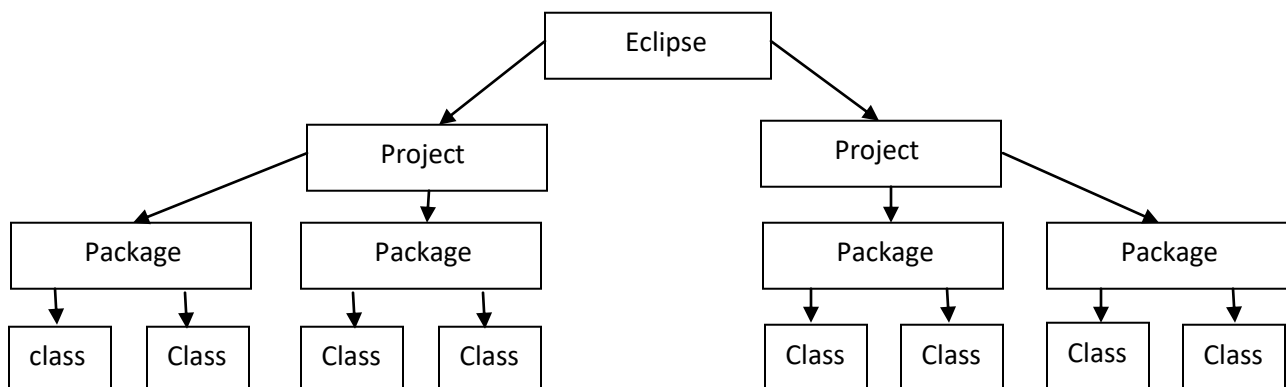

12. Create a java project, click finish, click the check box remember my decision then click Open perspective.

13. Just write simple java program and execute. Once it's done eclipse is installed successfully in our machine.

Eclipse Flow

Do's and Dont's of Eclipse

Dont's:

- We could not create one project inside another project
- We could not create one package inside another package
- We could not create one class inside another class

Do's:

- We could create multiple package inside a project
- We could create a multiple class inside a package
